# METERED GREASE DISPENSER

The **TKMGP** is specifically engineered for use in single-line progressive lubrication systems, offering an adjustable grease dispensing quantity that can be tailored to meet specific operational requirements. This advanced system operates efficiently using compressed air, ensuring consistent and reliable grease delivery.

The grease pump features a dedicated grease nipple for easy re-filling of the grease reservoir, allowing for straight forward maintenance and replenishment. The reservoir itself is constructed from durable, rigid materials to withstand the rigors of industrial environments. It incorporates a piston mechanism, which, when activated by pneumatic force, ensures a continuous and steady flow of grease into the metering system.

Our design guarantees precise and reliable lubrication, enhancing the performance and longevity of machinery while providing flexibility in grease dispensing to suit various operational needs.

**Features:**

1. Provides accurate and consistent grease dispense.
2. Delivers the same quantity of grease consistently, regardless of the number of operations.
3. Can be intergrade with existing system.
4. Auto / Manual filling.
5. Barcode scanning, Printing feature can be added as per requirement.
6. Reduces manual error and increases productivity.

SR NO	MODEL NO	GREASE DISPENSING CAPACITY (GM)	RESERVIOR CAPACITY (KG)	AIR PRESSURE (BAR)	TYPE (A/M)
1	TK-MGP-1	0.1-1	2	10	Auto(A) / Manual(M)
2	TK-MGP-2	1-4	3	10	Auto(A) / Manual(M)
3	TK-MGP-X	X	X	X	Customized

**Example-**

Ordering no. for standard Grease Dispensing System up to **1 GM** capacity, type A/M.

**TK-MGP-1-A**
